

## BREXIT - let's not come unstuck.

We're still no clearer what effect BREXIT will have in terms of procurement for UK manufacturing. But one thing is for sure – at ITAC we will be doing everything in our power to avoid any disruption in supply.

The vast majority of our products are made to order. Due to shelf life issues and sensible economics we order many specific raw materials as and when required. Our expectations are that this process may take longer than normal as the BREXIT date of 29th March 2019 approaches and beyond.

During this period, we would encourage all our customers to plan carefully the timing of any forthcoming orders from ITAC - in particular any 'time critical' orders that are needed and consider giving additional notice of these requirements to help us effectively source materials required.

We hope these simple contingency actions will negate any problems during these challenging times and help us all to move seamlessly into a productive and prosperous 2019.
