

its partnership

A confidential manufacturing partnership service for organizations within the adhesives and coatings industry.

Itac has been providing confidential manufacturing (toll) partnership services to a wide range of organizations, within the adhesives and coatings sector for over a century.

Major companies have always utilised outsourcing as an efficient, cost effective way of extending short or long term capacity. In the current economic environment the benefits of creating the right strategic business partnerships have never been greater.

By demonstrating our ability to work with the world's highest calibre companies, Itac has developed a reputation for understanding and controlling critical to function (CTF) process parameters which are vital to performance. Today, Itac is the partner of choice for many leading names in the industry.

Replicating Quality

Itac works in partnership with world class companies, who often operate within critical hi-tech areas of activity. We have developed systems to monitor their strict, crucial requirements to prove and measure process capability and repeatability.

We are able to manufacture to particularly rigid process parameters, in order to achieve 'cloned product replication'. These include automatic temperature and data acquisition, quantitative filtration and dispersion measurements.

Itac is fully equipped to implement 'steady state manufacturing' using customer focused statistical process control systems.

We operate an efficient plant with a comprehensive range of mixing equipment providing dry as well as wet compounding facilities. These include bulk mixing vessels with capacities ranging from 25-3,000 litres.

We are an Environment Agency accredited manufacturer authorised to use solvents.

Whether you are looking to focus your production on your strengths, want to test the market with a new product prior to setting up a production facility or simply are experiencing capacity problems, Itac is the perfect partner for companies who wish to contract out their production work.

Need a new or innovative adhesive?

Our **ITS**-intelligent technical solutions service gives you the opportunity to benefit from our unique knowledge and skills base by having a bespoke adhesive designed and formulated especially for your need.

ITS - intelligent technical solutions from **itac** adhesives
