

# PRESS RELEASE

---

*Itac provides its customers with a safer, simpler, more eco-friendly way to dispose of solvent based waste.*

Adhesives and coatings formulator Itac, is now working in partnership with Solvent Resource Management Limited (SRM) to provide its customers with a solvent waste collection and disposal service.

As a major processor of solvent based products, Itac is a Licensed Waste Transfer Operator. Its fully certified compliant capabilities for collection, allow the company to collect and consolidate its customers' waste products for transfer to SRM's advanced

facility in Morecambe, Lancashire. Once at SRM, the waste is then systematically filtered in a reclamation process which achieves up to 98% reuseable material.

By utilising its existing infrastructure and collecting waste at the same time as deliveries are made, Itac is able to achieve significant cost savings for its customers, who in turn reduce their carbon footprint and benefit from a safer, simpler way to dispose of waste.

Paul Armitt, Itac Managing Director, comments:

“Like most good ideas this is a simple concept. It is not only a cost effective solution, it is also a green answer, which has the added advantage of reducing our customers administration time. Itac is committed to adding extra value to all our services.”
